Education:

The City College of New York, New York, NY
B.S Computer Science (December 2019)
GPA:3.01

Course Work:

Databases	Data structures	Algorithms	Software Engineering
Operating Systems	Software Design	Paradigms	Data Visualization

Skills:

Languages: Java, Python, JavaScript, C/C++, HTML/CSS

Technologies: Linux, Git, MySQL, NodeJS, ExpressJS, JavaFX

Projects:

GameBook (Fall 2018)

- A social networking web app for gamers to meet other gamers. Created as a group project for databases class.
- Used technologies such as HTML/CSS, Node.JS, Express, Handlebars and MySQL.
- Responsible for implementing the design and functionality of the homepage, game page, and search page as well as designing schema for the database.

Document System (Fall 2018)

- A JavaFX application for creating, editing, and sharing documents.
- Programmed in Java and used a MySQL database to store document and user data.
- Responsible for the users document manager, text editor, and versioning system as well as schema designs.

Artificial Life Project (Spring 2017)

- Inspired by Conway's game of life, a randomly generated grid based world where 'organisms' are represented in cells and follow simple rules.
- Programmed using Java and JavaFX.
- Responsible for displaying the grid in its current state as well as logic behind the grid.

Internships:

Computer Science Teaching Assistant, Rockland Community College, Suffern, NY, 01/16-06/16

- Assisted students in debugging their Java code, completing assigned home works and understanding topics discussed in class.
- Took note of weak points from students during lecture to help improve the course over time.

Activities:

ASME Programmer (Fall 2018 – Present)

- Assisted in writing code to control a robot using an Arduino and Raspberry Pi.
